Abstract

Jola G.B. Prinsen (Tilburg University, Library & IT Services):

Implementing WMS and WCL at Tilburg University

Tilburg University Library was the first European library to implement OCLC's WorldShare Management Services (WMS) in February 2013, after going live with WorldCat Local in the summer of 2012.

Before migrating to WMS, Tilburg used OCLC's LBS3 system. Project manager Jola Prinsen will discuss the implementation project, paying attention to the planning, project organization, challenges, and lessons learned. She will conclude her presentation with an overview of the experiences with the system so far.
